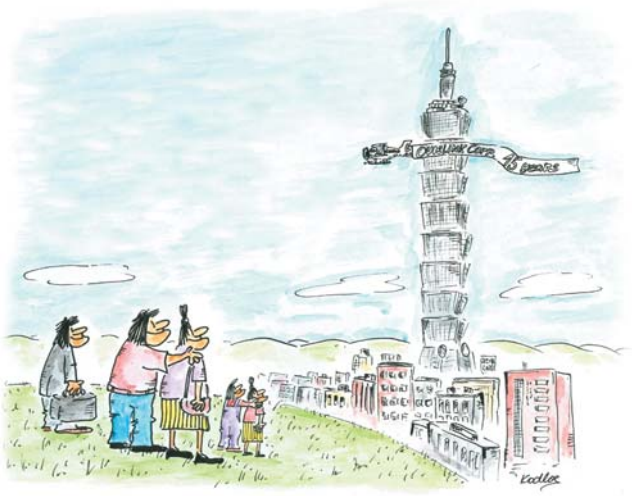
D Children's Room

AirLive™ range of Multimedia and SOHO products are designed to meet the most demanding needs of any home or small office setup.

Designed for practical usage in every situation, you will find AirLive™ products playing an important role in your everyday lives.

At AirLive™, we turn your regular home of today into a wireless mansion of tomorrow.

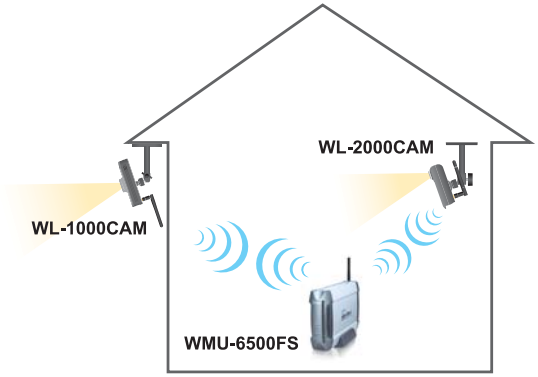


Surveillance systems have become a must for today's homes and offices. You can install the surveillance system the traditional CCTVs way, which are both costly and tedious, or you can do it the AirLive™ way.

By using AirLive™ advance Wireless IP Cameras and Turbo-G Wireless Hard Drive enclosure, you can set up a home surveillance system with Maximum Ease and Minimum Costs.

You get more features at a fraction cost over CCTVs such as

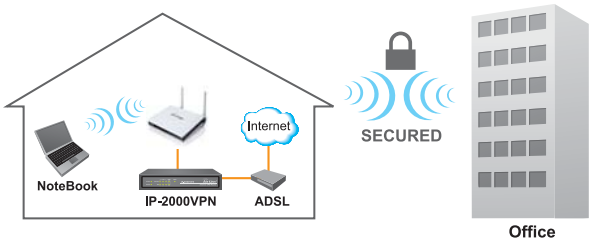
- Direct recording to your hard drive
- Live web and mobile phone streaming
- Wider coverage angles
- Excellent recordings under all lighting conditions



For the study room or your home office, AirLive™ Wireless-N router and Internet VPN Router gives you all the data security you need and all the wireless freedom you desire.

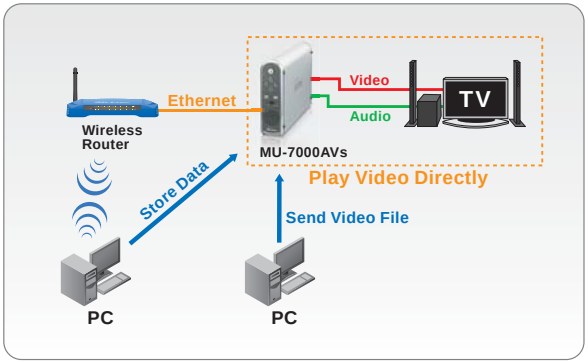
Forget about expensive lease line connection, AirLive™ Internet VPN Routers create a secure connection between your home-to-office or office-to-office using your existing broadband connection.

And with our Wireless-N router, you can create a high-speed network connection that is 6 times faster, in ACUTAL TRANSFER RATE, than standard Wireless-G devices and it will cover virtually every corner in your home or office.



For the living room, let AirLive™ Download Agent do your downloading for you while your computer rests.

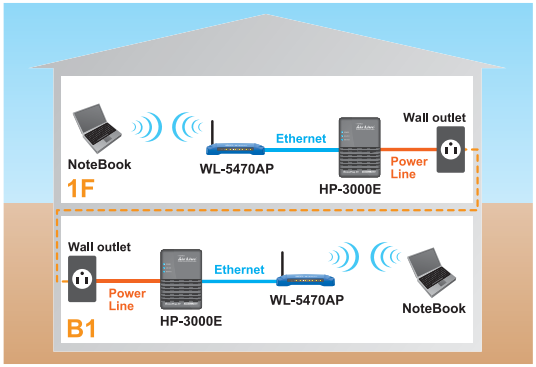
Together with our Multimedia Network hard drive, you can now built the Digital Home Entertainment System you always dreamed of:



- Have full control of the computer right from the comfort of your living room
- Watch a movie purchased from iTunes Store or video streaming from YouTube directly on your new Hi Definition TV

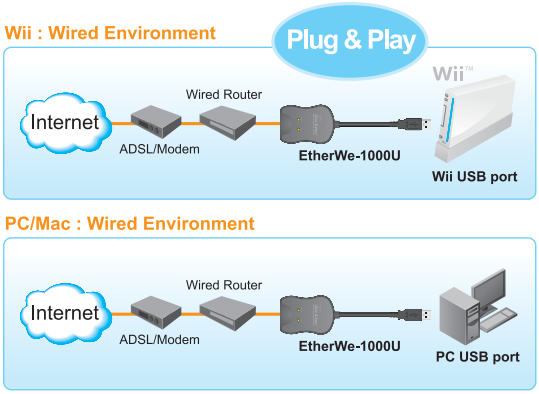
Thick concrete walls or partitions may be blocking your wireless signal from reaching some areas such as the basement. Now, you can break down that wall barrier with AirLive™ latest PowerLine Adapter that delivers your data using your existing electrical wiring at an amazing speed.

No more messy cabling jobs or additional monthly broadband charges. What you have left is a smooth network connection at a minimum fuss.



For the game room, our gigabit switches give you a smooth gaming experience when playing network games on your Playstation™ or XBox™.

Setting up Internet connection for your Wii™ console has never been easier and faster with AirLive USB Ethernet Adapter. You will be able to get your Wii™ connect to the Internet in a matter of seconds.



AirLive™ has a solution for every member in the family.

Networking @ Home

A Home Network makes it possible for you to share Internet connection, devices such as scanner and printer and connecting multiple computers together.

A good and reliable router is important, as it can be considered as the heart of the entire network. AirLive™ Wireless Routers gives you the power, stability and security to keep your network running uninterrupted and providing you with the widest wireless coverage.

Together with AirLive™ Broadband products you can set up your home network in no time and start sharing Internet connection and save on your monthly broadband charges.

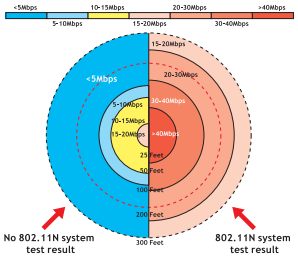
For the power users, we also have a wide range of Multi Functions, Multi Bands Access Points that let you build a robust network that suits your demanding needs.

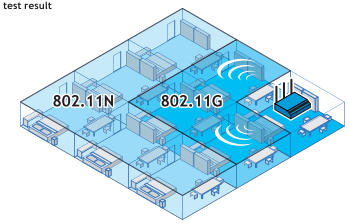
AirLive Wireless-N Solutions

AirLive™ Wireless-N solutions gives you a faster, wider and farther wireless coverage and delivering up to 120Mbps in Actual Transfer Rate. That is 600% faster than your standard Wireless-G router. It is even faster than your regular 10/100 Base-T Ethernet connections.

It also covers a wider and farther area than your standard Wireless-G router too, it leaves you with virtually no wireless dead spots.

AirLive™ Wireless-N Solution is great for applications such as online gaming, VoIP and Video Streaming where a constant and fast transfer rate is required.





WN-301R

Wireless 11n Integrated Antenna Broadband Router

Built-in antenna for a touch of class

Full backward compatibility with your existing wireless router/adapter, allowing you to protects your current investment while making your wireless network ready for the future

New elegant design that fits perfectly in the modern home décor

Cover a wider and farther range leaving you with no wireless dead spots

Total protection of your network with multiple advance security features

- 802.11n Technology, 300Mbps Wireless Transfer Speed
- WPS Push Button Support
- Support Multiple Wireless Mode
- Supports QOS and Email Alert
- Supports Multi SSID and SSID Isolation
- Full Compatibility with Turbo-G and Wireless-G , MiMo-G

WN-300R

Wireless 11n Broadband Router

Removable antennas allows changes to suit your networking needs

Full backward compatibility with your existing wireless router/adapter, allowing you to protects your current investment while making your wireless network ready for the future

New elegant design that fits perfectly in the modern home décor

Cover a wider and farther range leaving you with no wireless dead spots

Total protection of your network with multiple advance security features

- 802.11n Technology, 300Mbps Wireless Transfer Speed
- WPS Push Button Support
- Support Multiple Wireless Mode
- Supports QOS and Email Alert
- Supports Multi SSID and SSID Isolation
- Full Compatibility with Turbo-G and Wireless-G , MiMo-G

WN-200R

Wireless b/g/n 150M Broadband Router

Full backward compatibility with your existing wireless router/adapter, allowing you to protects your current investment while making your wireless network ready for the future

Faster file transfer than standard 802.11g devices - up to 150Mbps

Total protection of your network with multiple advance security features

- 802.11n Wireless Broadband Router
- WPS Push Button Support
- Support Multiple Wireless Mode
- Supports Multi SSID and SSID Isolation
- Full Compatibility with Turbo-G and Wireless-G

WN-300USB

Wireless 11n USB Dongle

Full backward compatibility with your existing wireless router/adapter, allowing you to protects your current investment while making your wireless network ready for the future

Small and new elegant design for easy carrying

Total protection of your network with multiple advance security features

- Fully Compatible with Wireless-G and Turbo-G networks
- 1T1R Data Stream (Transfer rate up to 150Mbps)
- USB 2.0 Interface
- Mini Pen Size Dongle
- WEP, WPA, WPA2 Encryptions

WN-360USB

High Power 11n USB Adapter With 5dBi Detachable Antenna

Full backward compatibility with your existing wireless router/adapter, allowing you to protects your current investment while making your wireless network ready for the future

Removable antennas allows changes to suit your networking needs

High Power for greater and further coverage

Total protection of your network with multiple advance security features

- 23 dbm output power, 20 dbm for Europe only
- High Power For Greater Distance Coverage
- Wireless Physical Speed Up to 150Mbps
- Soft AP (Access Point) Feature Creates AP Function
- Compact Design for Greater Mobility

WN-5000R v2

802.11n Wireless Router

Greater sharing options with 4 LAN ports.

Covers a wider and farther range leaving you with no wireless dead spots.

Faster file transfer, up to 120Mbps in real transfer rate. 6 times faster than standard 802.11g devices.

- 4 x 10/100Mbps LAN ports
- 802.11n Speed
- PPTP, L2TP, PPPoE, DHCP, Fixed, Bigpond ISP supports
- WPS push button support
- WDS repeater function, WEP, WPA, WPA2
- 802.11e, 802.11d, 802.11h, and WMM support

WN-5000USB v2

802.11n Wireless USB Adapter

Easy one touch encryption

Pen-Size USB adapter that is small enough to carry with you everywhere

Faster file transfer, up to 120Mbps in real transfer rate. 6 times faster than standard 802.11g devices.

- USB 2.0 Interface
- 802.11n Speed
- Compact Pen Size
- WEP, WPA, WPA2 Encryptions
- WPS push button support
- 802.11e, 802.11d, 802.11h, and WMM support

WN-5000PCI v2

802.11n Wireless PCI Adapter

3 detachable antennas for optimal reception and coverage

Faster file transfer, up to 120Mbps in real transfer rate. 6 times faster than standard 802.11g devices

- PCI Interface
- 802.11n Speed
- Compact Pen Size
- WEP, WPA, WPA2 Encryptions
- WPS push button support
- 802.11e, 802.11d, 802.11h, and WMM support

WMM-3000R

MIMO-G Wireless Broadband Router

Easy and fast installation with support for all ISP authentications around the world.

Ultra high-speed router with amazing 95Mbps routing speed for disruption-free Internet sharing

Suitable to be used in any networking environments as it comes with advanced wireless functions

MIMO-G provide you with a wider wireless coverage

- 4 x 10/100Mbps LAN ports
- Dual Antenna and Radio, 802.11g/b compatible
- PPTP, L2TP, PPPoE, DHCP, Fixed, Bigpond ISP supports
- Client isolation, Hide SSID, 802.1x radius, SNMP
- WDS repeater function, WEP, WPA, WPA2
- 802.11e, 802.11d, 802.11h, and WMM support

WMM-3000AP

MIMO-G Access Point

Faster speed transfer and wider wireless coverage

4 LAN ports for greater sharing flexibility

Suitable to be used in any networking environments as it comes with advanced wireless functions

- 4 x 10/100Mbps LAN ports
- Dual Antenna and Radio, 802.11g/b compatible
- MIMO + XR Technology for extend range
- Client isolation, Hide SSID, 802.1x radius
- WDS repeater function, WEP, WPA, WPA2
- 802.11e, 802.11d, 802.11h, and WMM support

WT-2000AP

Turbo-G Access Point

4 LAN ports for greater sharing flexibility

Faster speed transfer

Suitable to be used in any networking environments as it comes with advanced wireless functions

- 4 x 10/100Mbps LAN ports
- Compatible with 802.11g/b devices
- Turbo-G technology for up to 2X speed of 802.11g
- Client isolation, Hide SSID, 802.1x radius
- WDS repeater function, WEP, WPA, WPA2
- 802.11e and WMM support

WL-1600GL

802.11g Wireless Broadband Router

High speed performance up to 125Mbps

Fast and easy installation with support for all major ISPs

WPS protection for fast and simplified encryption

- 802.11g Wireless with High Speed Performance Mode (Backward compatible with standard 802.11b/g)
- Parental Control
- URL Filter, Denial of Service and Firewall
- PPTP, L2TP, PPPoE, DHCP, Fixed, Bigpond ISP supports
- WEP, WPA, WPA2 and WPS supports

WL-1500R

802.11g Wireless Broadband Router

Wider range coverage with Athero's eXtended Range support

Easy and fast installation with support for all ISP authentications around the world

Parental Control to block off unwanted websites

- 4 x 10/100Mbps LAN ports
- 802.11g/b Wireless
- Athero's XR support
- PPTP, L2TP, PPPoE, DHCP, Fixed, Bigpond ISP supports
- WEP, WPA, WPA2 supports
- TTL, Hide SSID supports

IP-1000R

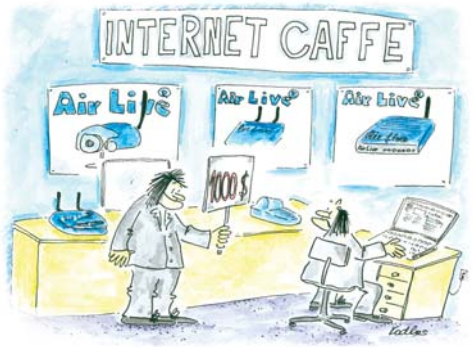
Wired Broadband Router

High-speed router with amazing 95Mbps routing speed for disruption-free Internet sharing

Easy and fast installation with support for most ISP authentications around the world

Built-in firewall for extra level of protection

- 1 x WAN port + 4 LAN ports
- PPTP, L2TP, PPPoE, DHCP, Fixed, Bigpond ISP supports
- Wirespeed Routing, Wake-On-LAN
- SNMP, Syslog, Scheduled Firewall



Networking @ Home

WL-1600USB

High Power 11g USB Adapter With Detachable Antenna

Compact Design for Greater Mobility

Extended Range Antenna for 2x the distance coverage

High Power for longer distance coverage

- High Power For Greater Distance Coverage
- Detachable 5dBi Dipole Antenna
- Software AP Function

WT-2000PCI

Turbo-G Wireless PCI Adapter

Advance encryption support providing you an even more secure connection

Works with your existing networking equipments. Compatible with earlier wireless standard

Faster transfer with Turbo-G standard

- PCI interface for Desktop PC
- Compatible with 802.11g/b devices
- Turbo-G technology for up to 2X speed of 802.11g
- WEP, WPA, WPA2 Encryptions
- 802.11e and WMM support

WT-2000USB

Turbo-G Wireless USB Adapter

Advance encryption support providing you an even more secure connection

Works with your existing networking equipments. Compatible with earlier wireless standard

Faster transfer with Turbo-G standard

Pen-Size USB adapter that is small enough to carry with you everywhere

- USB 2.0 interface
- Compatible with 802.11g/b devices
- Turbo-G technology for up to 2X speed of 802.11g
- WEP, WPA, WPA2 Encryptions
- 802.11e and WMM support

WL-5480USB-50

Wireless-G USB Adapter with removable Antenna

Detachable antenna to give you the flexibility to choose the antenna that best suits your needs

Software AP turns your PC into an Access Point - Saving you cost on additional devices

Supports all major operating systems

- Wireless-G USB + 5dBi Dipole antenna
- R-SMA Connector for antenna
- Software AP, WPA, and 802.11i

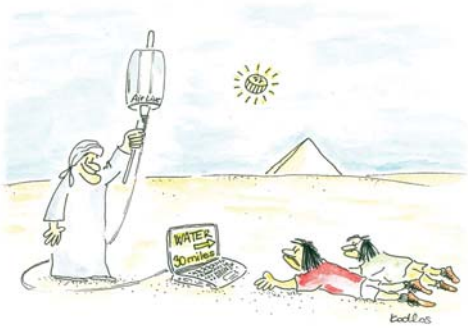
WL-1100SD

802.11b WLAN SDIO Card

For PDA and Smartphone

Let your handheld devices access the Internet and network everywhere

- 802.11b WLAN SDIO Card
- For PDA and Mobile Phone
- PocketPC 2002/2003 Support



ADSL Modems

Incredible speed and simplicity of installation, that's what the AirLive™ ADSL Modem delivers.

AirLive™ ADSL modem gives you a wide choice of ADSL standards to meet that of your Internet Service Provider. From ADSL2 to ADSL 2+ to the latest ADSL 2+M, AirLive™ covers it all.

Setting up AirLive™ ADSL Modem has never been easier. AirLive™ ADSL modem works right out of the box. Just tell the Auto Setup Wizard the country you are in and input in your username and password and you will be connected to the Internet. No more worries about those complex ADSL parameters.

WN-300ARM-VPN

11n ADSL VPN Router

Fast VPN connection for a reliable and secure connection to your office network

Full backward compatibility with your existing wireless router/ adapter, allowing you to protect your current investment while making your wireless network ready for the future

Total protection of your network with multiple advance security features

Faster file transfer than standard 802.11g devices - up to 300Mbps

- 4 x 10/100Mbps LAN ports
- ADSL, ADSL2, ADSL2+ support
- IPSec VPN server
- Up to 5 IPSec VPN tunnel
- WPS function support
- Wireless-G and Broadcom Afterburner Compatible
- Removable antennas allows changes to suit your networking needs

WT-2000ARM

Turbo-G Wireless ADSL 2/2+/2+M Router

- Built-in ADSL Modem
- Turbo-G standard to give you a faster wireless transfer rate. Perfect for ADSL2+M speed
- Compatible with all major ISP and speed
- Simple to use Auto Setup Wizard

- 4 x 10/100Mbps LAN ports
- 1 x ADSL RJ-11 port
- Turbo-G Wireless
- ADSL, ADSL2, ADSL 2+, ADSL2+M supports
- Auto CD Setup Wizard

ARM-204 v2

4 Ports Wired ADSL 2/2+/2+M Router

- Built-in ADSL Modem
- Compatible with all major ISP and speed
- Simple to use Auto Setup Wizard

- 4 x 10/100Mbps LAN ports
- 1 x ADSL RJ-11 port
- 1 x USB port
- ADSL, ADSL2, ADSL 2+, ADSL2+M supports
- Auto CD Setup Wizard

ARM-201

1 Port Wired ADSL 2/2+/2+M Router

Built-in ADSL Modem

Compatible with all major ISP and speed

Simple to use Auto Setup Wizard

- 1 x 10/100Mbps LAN ports
- 1 x ADSL RJ-11 port
- 1 x USB port
- ADSL, ADSL2, ADSL 2+, ADSL2+

AirLive™ Wireless products are designed for flexibility, scalability and expandability.

When your network requirements change, such as an extension to your house or office or simply a need for greater distance coverage, it doesn't mean you will need to change your router or access point too.

Simply add an indoor booster or a change of antennas would usually meet your new networking demands. Saving you money without comprising your networking needs.

AirLive™ Wireless products come with a detachable antenna design. Together with our wide range of indoor antennas, you will find an antenna that best suits your need.

AirLive Indoor Boosters

The AirLive indoor power booster family provides the most comprehensive selections of indoor boosters. The installation doesn't involve any software; just connect one end to antenna and the other end to the AP. You wireless signal is instantly amplified.

- **WPA-2400IG-20 :** 802.11g / 20dBm(100mW) output.
- **WPA-2400IG-27 :** 802.11g / 27dBm (500mW) output.

AirLive Indoor Antennas

WAI-050 / WAI-080

- 2.4Ghz 5dBi / 8dBi Rubber Dipole Antenna
- 360 Degree Horizontal, 40 Degree Vertical
- Connect Directly to AP
- Swivel Head

WAI-101

- 2.4Ghz 10dBi Rubber Dipole Antenna
- 360 degree Horizontal, 20 degree Vertical
- Up to 5 times distance
- Versatile Mounting Design
- Swivel Head

WAI-100PA

- 2.4Ghz 10dBi Patch Antenna
- Female SMA connector
- Indoor Point-to-Point use

WAI-102PA

- 2.4Ghz 10dBi Indoor Patch Antenna
- Ultra compact design
- Swivel and Tilt
- Desktop or Wall Mount

Multimedia

Bringing Multimedia Experience to Greater Heights

AirLive™ Multimedia products have grown by leaps and bounds over the years. From our award-wining all-in-one multimedia router in 2004 till today where we have a complete range of multimedia products to satisfy all your multimedia needs.

From our Multimedia Server that will change your video viewing experience forever, to our hard drive enclosure that does your downloading for you, to our Internet Cameras that allows you to monitor your valuables from anywhere in the world, AirLive™ does it all.

AirLive™ Multimedia products are designed to provide you with an awesome, practical and easy to use product that work right out of the box. AirLive™ Multimedia products - they just work better.

At AirLive™, we bring your multimedia experience to greater heights.

WMU-6500FS

3.5" Turbo-G Wireless HD + BT Download Agent

No more overnight download that will reduce the lifespan of your computer

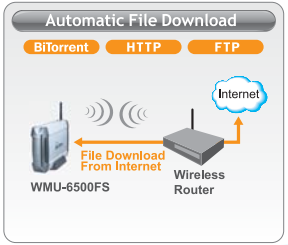
Download Agent to do your downloading for you

Free your computer for more important tasks

Fits right into your existing network setup with both AP and Client mode

Faster download and transfer with Turbo-G standard

- 125Mbps Turbo-G Wireless Function
- Compatible with standard 11g and 11b device
- 3.5" Hard Drive Bay
- 2 x USB 2.0 port for USB memory device
- OTG function
- SATA or IDE Interface
- Samba File Sharing
- FTP server
- Bit Torrent Download Agent
- FTP and HTTP Download Agent



Multimedia

MU-7000AVs

3.5" Multimedia Network Hard Drive

Full feature remote control operates just like a regular DVD player

Eliminates the needs to burn DVDs, saving you time and money

No restriction on hard drive interface as it supports both IDE and SATA

Playback your video, audio files and even your family photo album directly to the TV

Hi-Speed transfer with fast Ethernet connection

- Multimedia Network Hard Drive Enclosure
- 1 Video + 1 Audio Port
- 1 x RJ-45 Ethernet Port
- Support 3.5" IDE and SATA Drive
- Support MPEG, MPEG2, MPEG 4 video format
- Play back AVI, MPG, DAT, VOB, DivX, Xvid
- 5.0,MP3, JPG, motion JPEG files
- NTSC and PAL Support
- S-Video and RCA Connector
- USB 2.0 port for direct connection with PC
- Remote Control Included

WMU-6000FS

2.5" 802.11g Wireless HD

Multi-function mode let it fit into any network setup

Small and compact design

USB ports for adding external storage

One Touch Backup giving you convenient and instant backup

Wireless technology lets you share files without messy cables

- 54Mbps Wireless multi-function AP
- AP, WDS, Bridge mode
- Internal 2.5" IDE Drive Bay
- Samba, FTP, OTG servers
- Support FAT32 or EXT2 file format
- One Touch OTG Backup Function
- Bit Torrent Download

MU-5000FS

Network File Server

Schedule backup means you will never lose your data again

Built-in FTP Server allows you to access your files from the Internet

Per-directory authentication provides you with extra level of data security. Suitable for corporate user too

Cost Effective ways to share your Flash drive, USB HD, and CD-ROM over the network

Easy Management lets you control the FTP server with maximum east

- 2 x USB 2.0 Ports
- Samba and FTP servers
- Support FAT32 format
- Share USB storage and CD-ROM
- Per-directory Authentication
- Scheduled Download from Internet

BT-201USB / BT-202USB

Bluetooth 2.0 USB Adapter

EDR Technology gives you a boost in performance while remain compatible with earlier Bluetooth devices

Instantly turns your Notebook and PC into a Bluetooth capable device

Connects your computer to mobile phones, PDA, notebooks, printers or Bluetooth headset without the need for cables

- **BT-201USB:** Class 1 for up to 100meter distance
- **BT-202USB:** Class 2 for over 10meter distance
- Bluetooth 2.0 USB Adapter
- EDR mode: 3 Times the speed of Bluetooth 1.2
- Broadcom Chipset, Widcomm Utility
- USB 1.1 spec

AirTV-1000U v2

DVB-T USB2.0 Receiver

- Design for Notebook PC
- Turn your PC into Digital TV
- Full Functioned Remote Control
- Schedule Recording Capability
- Image Capture Capability
- Watch Digital TV Wirelessly Anywhere

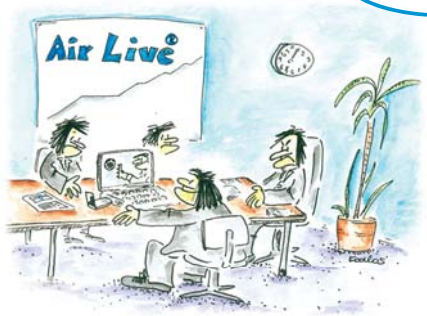
Full function remote control works just like a regular TV

Never miss a TV show again with its Schedule Recording function

Transforms your Notebook into a digital TV instantly

Includes ArcSoft TotalMedia Software for all your Digital Entertainment needs

High gain antenna to improve reception



AirVideo-2000

802.11g Wireless Video Presenter

Display the content of your notebook on the projection screen wirelessly. No more long and messy cables

No software installation required with its Zero Driver dongle creator

Powerful processor allows smooth playback of video files right from your laptop

Switch notebooks instantaneously saving you time and hassle during meetings

- 802.11g Wireless
- D-SUB VGA connector
- Audio Jack and RJ-45 Ethernet port
- Support WXGA (1280x768), XGA (1024x768),SVGA
- (800x600) resolutions
- MPEG, MPEG2, MPEG4 playbacks
- Switch Notebooks Instantaneously

Advance IP Cameras

Convenient, Compact and Cost-effective, that is how AirLive™ Wireless IP Cameras let you monitor your valuables and establishments. Connect to your existing network, it allows you to access the camera from anywhere with Internet connection. AirLive™ Wireless IP Cameras let you archive the footage offline for future use by recording directly to your hard drive. Wide range Pan/Tilt provides you with a wider coverage reducing the total number of cameras needed. Superior low light performance lets you take excellent footage in all lighting conditions. Up to 16 cameras can be viewed on a single screen for maximum efficiency when managing your cameras. Two way audio and live streaming to your mobile phone, giving you much more function at a much lesser cost than conventional CCTVs.

OD-300CAM

1/4 CMOS Dual Stream Outdoor IR IP Camera

Improve bandwidth efficiency without losing picture quality with dual streaming

Durable metal enclosure for operation all weather conditions

Record footage even in complete darkness with Infrared LED

Transmit power and data from a single source with 802.3af PoE Port

Provide live audio communication or use it as a broadcasting station with 2-way Audio

- Outdoor Infrared PoE IP Camera
- HTTPS Encryption for enhanced internet security
- Simultaneous Motion JPEG and MPEG-4 Dual Streaming
- Supports Two-Way Audio
- 21 Powerful Infrared LED for up to 15 meter illumination in complete darkness
- CamPro Express-v16 Channel recording software
- 2.5G or 3G Mobile Phone Live Viewing
- 802.3af PoE Port

POE-100CAM

1/3 SHARP™ CCD Dual Stream PoE IP Camera

Superior video quality with high grade professional CCD lens

Transmit power and data from a single source with 802.3af PoE Port

View footage from anywhere in the world with Web Monitor and Mobile Phone viewing

Includes professional software with advance features for all your surveillance needs

Improve bandwidth efficiency without losing picture quality with dual streaming

- CCD Dual Stream PoE IP Camera
- Support MPEG-4 and Motion JPEG encoding
- 2-way Audio capability
- CamPro Express-v16 Channel recording software
- Web Monitor, Mobile Phone viewing, 3GGP
- 802.3af PoE Port

POE-200CAM

1/3 SHARP™ CCD Dual Stream PoE IP Camera

Superior video quality with high grade professional CCD lens

Durable metal enclosure for operation all weather conditions

Improve bandwidth efficiency without losing picture quality with dual streaming

Includes professional software with advance features for all your surveillance needs

Transmit power and data from a single source with 802.3af PoE Port

- Dome Type PoE IP Camera
- 2-Way Audio Capability
- Dual Stream MPEG-4 and Motion JPEG Support
- 2.5G and 3.5G View from Mobile Phone
- CAMPRO Express-v16 channel recording software
- Language Pack and Web Monitor
- 802.3af PoE Port

WL-2600CAM

Wireless Pan-Tilt Night Vision IP Camera

Motorized wide-range Pan/ Tilt allows you to scan and patrol a wider area coverage
Two-way audio makes it suitable for installation at entrance area where you need to identify the visitor
Live streaming to the Internet or your mobile phone
Infrared LEDs lets you take picture even in total darkness
30 FPS capturing ensures smooth and excellent picture quality identified the visitor

- Motorized Wide-Range Pan 355 degree and Tilt 135 degree
- Superior Low-light Performance with Automatic Night-mode
- 2.5G / 3G Mobile Phone Live Viewing
- RTSP Live-viewing Supported Two-way audio with built-in microphone
- Simultaneous Motion JPEG & MPEG-4
- Dual Streaming
- Excellent image quality with up to 30 FPS in all resolutions
- UPnP for fast and easy installation
- CAMPRO Express-v16 channel recording software

WL-2000CAM

Auto Light Sensor Wireless-G Multi-Profile IP Camera

Infrared LEDs lets you take picture even in total darkness
Live streaming to the Internet or your mobile phone
Up to 16 cameras simultaneous viewing, giving you a bird's eye view of the entire area
30 FPS capturing ensures smooth and excellent picture quality

- 802.11g Wireless
- Record up to 16 cameras
- 30 FPS at 640 x 480, 320 x 240, and 160 x 120
- CMOS sensor, 0.5 Lux
- Superior Low-light Performance with
- Automatic Night-mode
- 2.5G / 3G Mobile Phone Live Viewing
- RTSP Live-viewing Supported Two-way audio with Built-in Microphone
- CAMPRO Express-v16 channel recording software

WL-1200CAM

Wireless-G Dual Mode IP Camera

- Advance image compression makes your picture reduce in file size but not on quality
- Live streaming to the Internet lets you view the images from anywhere
- 30 FPS capturing ensures smooth and excellent picture quality
- Plug-n-Play makes installation and usage a breeze

- High speed hardware-based image compression
- 802.11g 54Mbps Wireless + WPA2 Security
- Support 640 x 480, 320 x 240 resolution
- Simultaneous Motion JPEG & MPEG-4
- Dual Streaming
- Up to 30 FPS image resolutions
- UPnP for fast and easy installation
- Bundle surveillance software

WL-1000CAM

Wireless-G Motion JPEG IP Camera

- 20 FPS capturing provides excellent picture quality
- Advance image compression makes your picture reduce in file size but not on quality
- Live streaming to the Internet lets you view the images from anywhere
- Plug-n-Play makes installation and usage a breeze

- High speed hardware-based image compression
- 802.11g 54Mbps Wireless + WPA2 Security
- Support 640 x 480, 320 x 240 resolution
- Up to 20 FPS image resolutions
- UPnP for fast and easy installation
- Bundle surveillance software

Print Servers

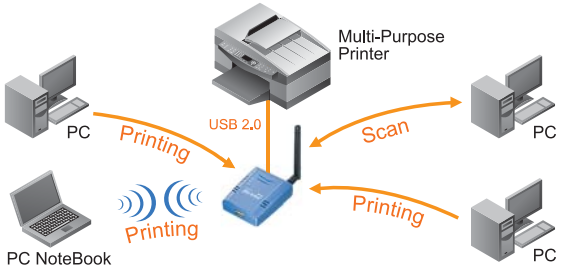
It is common for every member in your household or office to have his or her own computer. But what about the use of common resources such as printer or scanner?

You could buy a multi function printer for every member or change your existing multi function printer to those expensive network capable models. Either way, they will be costly and inconvenient to you.

AirLive™ Multi Function Print Server offers you a convenient and cost effective solution by allowing all members on your network to share single purpose or Multi Function Printers.

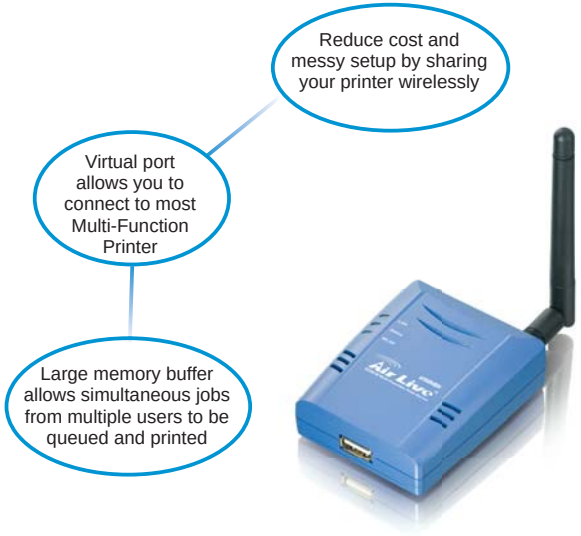
Using advance technology, AirLive™ Print Server creates a Virtual USB port that will work with most major brands of Single purpose Printers or Multi Function Printers, including those that use proprietary printing protocol, giving you a wider choice of printer selection.

As it connects directly to the network, instead of a computer, you can print even when the other computers are offline.With Print Server function built-in, you can print and scan without the need to attend to the printer/scanner as it will handle all print sharing, giving you the greatest of convenience. Also with automatic installation wizard, setting up the device is a breeze.



WFP-101U

Wireless Multi-function Print Server

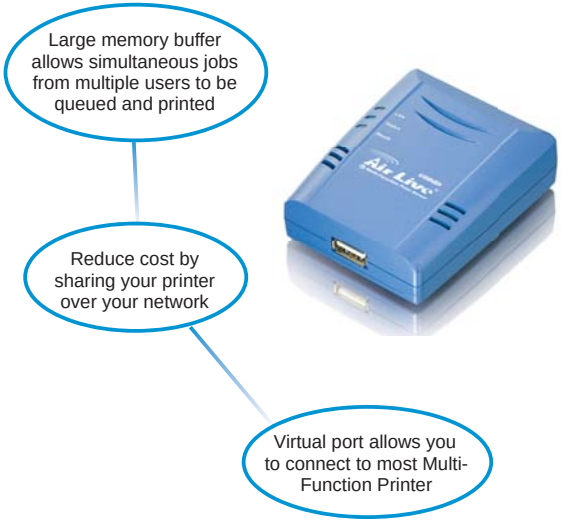


Reduce cost and messy setup by sharing your printer wirelessly
Virtual port allows you to connect to most Multi-Function Printer
Large memory buffer allows simultaneous jobs from multiple users to be queued and printed

- Wireless Multi-Function Print Server
- Share your Multi-Function printer at 54Mbps wirelessly
- Share Printing, Scanning, Card Reading Functions
- Virtual USB + Print Server Combo
- USB 2.0 High Speed

MFP-101U

Wireless Multi-function Print Server

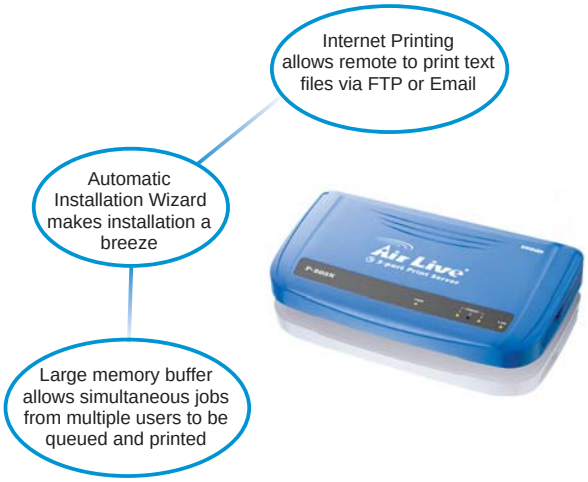


Large memory buffer allows simultaneous jobs from multiple users to be queued and printed
Reduce cost by sharing your printer over your network
Virtual port allows you to connect to most Multi-Function Printer

- Wired Multi-Function Print Server
- Share your Multi-Function printer
- Share Printing, Scanning, Card Reading Functions
- Virtual USB + Print Server Combo
- USB 2.0 High Speed

P-203N

3-port Wired Print Server

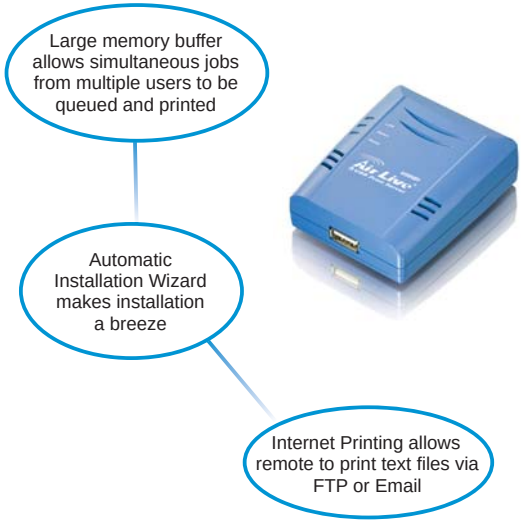


Internet Printing allows remote to print text files via FTP or Email
Automatic Installation Wizard makes installation a breeze
Large memory buffer allows simultaneous jobs from multiple users to be queued and printed

- 2 x USB 2.0 + 1 x Parallel Ports
- UPnP and Installation Wizard
- Remote Internet Printing
- Windows, Netware, Linux, Mac OS, and Unix support
- SNMP, Email notification and Access Control

P-201U

1-port USB Print Server



Large memory buffer allows simultaneous jobs from multiple users to be queued and printed
Automatic Installation Wizard makes installation a breeze
Internet Printing allows remote to print text files via FTP or Email

- 1 x USB 2.0 port
- UPnP and Installation Wizard
- Remote Internet Printing
- Windows, Netware, Linux, Mac OS, and Unix support
- SNMP, Email notification and Access Control

WP-203G

3-port Wireless Print Server

Automatic Installation Wizard makes installation a breeze
Internet Printing allows remote to print text files via FTP or Email
Wireless Technology eliminates the needs for cables
High power wireless system offers you a wider area coverage
Large memory buffer allows simultaneous jobs from multiple users to be queued and printed

- 2 x USB 2.0 + 1 x Parallel Ports
- 802.11g Wireless, 20dBm, client mode.
- UPnP and Installation Wizard
- Remote Internet Printing
- Windows, Netware, Linux, Mac OS, and Unix support
- SNMP, Email notification and Access Control

WP-201G v2

1-port Wireless USB Print Server

Wireless Technology eliminates the need for cables
High power wireless system offers you a wider area coverage
Large memory buffer allows simultaneous jobs from multiple users to be queued and printed
Automatic Installation Wizard makes installation a breeze
Internet Printing allows remote to print text files via FTP or Email

- 1 x USB 2.0 port
- 802.11g Wireless, 20dBm, client mode.
- UPnP and Installation Wizard
- Remote Internet Printing
- Windows, Netware, Linux, Mac OS, and Unix support
- SNMP, Email notification and Access Control

VoIP and Skype

The development of the VoIP technology in the recent years has dramatically changed how people communicate with each other. Not only the Internet lets you send out email at virtually no cost, they also let you make calls to other PC in similar ways via the Internet. With the rise of ITSP (Internet Telephony Service Providers), charges for long distance calls to mobile and landlines has also dropped dramatically. Now, you can make phone calls to people half the globe away cheaper than local call charges.

AirLive™ VoIP products now come with its own free VoIP Service called "AirLive.SIP". AirLive™ SIP VoIP products are pre-configured with AirLive.SIP accounts so you can instantly enjoy the VoIP advantage without any complex configurations. Talk about Maximum Saving at Maximum Convenient. The AirLive.SIP service is currently for AirLive-to-AirLive calls only and it is currently free of charge.

Sky-211

Skype Phone Gateway

3-way conference between regular phone call and Skype call

Use your regular phone set to make calls on Skype

Enjoy the savings of Skype call and the convenience of a regular phone

Forward instant messages to your mobile phone via SMS

- 1 x USB 1.1/2.0 port
- 1 x FXO + 1 x FXS port
- Use the same phone for both PSTN and Skype calls
- Free 3-Way conference calling between PSTN and Skype calls
- Different tone for incoming PSTN and Skype
- Redirect calls from PSTN to Skype or Skype to PSTN

Skyphone-1000

Wireless Skype Phone

Large LCD display shows you the call information in one glance

Makes Skype calls wirelessly

Full feature phone book with customize ring tone for each contact

- 1 x Bluetooth USB dongle
- 1 x Wireless Handset
- Bluetooth Class 1 support
- Skype phonebook and dial/hangup support
- LCD display for caller ID, contact list, and calling list
- Support Hot-keys, personal ring type, phone book
- Volume control and mute function
- Work as microphone and earphone with Yahoo/MSN messenger

VoIP-111A / VoIP-120A

SIP VoIP ATA Adapter

Free calls to other AirLive VoIP devices through AirLive. SIP server

Pre-configured with AirLive.SIP account for instant connection without complex configurations

IP Sharing allows you to make VoIP calls and surf the Internet under the same Internet connection

Converts your regular phones into VoIP phones

- **VoIP-111A:** 1 FXS port + 1PSTN port
- **VoIP-120A:** 2 x FXS ports
- 1 LAN + 1 WAN port
- IP Sharing Router function
- STUN server and Outbound proxy support
- G.711, G.723.1, G.726, and G.729 a/b, iLBC Codec supports
- Call forward, call waiting, call hold, 3-way conference support
  Speed dial and phonebook support

VoIP-210RS / 220RS / 211RS

SIP VoIP Router

Hotline function dial a pre-define number for you for convenient and instant calls

IP Sharing allows you to make VoIP calls and surf the Internet under the same Internet connection

Free calls to other AirLive VoIP devices through AirLive.SIP serversame Internet connection

Built-in IPsec VPN server for secure VoIP calls

Pre-configured with AirLive.SIP account for instant connection without complex configurations

- **VoIP-210RS:** 1 FXS port
- **VoIP-220RS:** 2 FXS ports
- **VoIP-211RS:** 1 FXS + 1 FXO port
- 1 LAN + 1 WAN port
- IP Sharing Router function
- STUN server and outbound proxy support
- G.711, G.723.1, and G.729 A/B Codec supports
- Hotline support
- IPsec VPN server
- Web configuration

VoIP-440S

4-port SIP VoIP Gateway

Create up to 4 VoIP channels

Hotline function dial a pre-define number for you for convenient and instant calls

Pre-configured with AirLive.SIP account for instant connection without complex configurations

Free calls to other AirLive VoIP devices through AirLive.SIP server

- 4 FXS ports
- 1 WAN port
- STUN server and outbound proxy support
- G.711, G.723.1, and G.729 A/B Codec supports
- Hotline support
- Web configuration

ePhone-1000S

SIP IP Phone

Full feature phone that allows you to make VoIP calls without the need for a computer

Hotline function dial a pre-define number for you for convenient and instant calls

Pre-configured with AirLive.SIP account for instant connection without complex configurations

Free calls to other AirLive VoIP devices through AirLive.SIP server

- 1 WAN port
- 1 Head Phone + 1 MIC Jack
- DHCP / Fixed IP / PPPoE mode
- Large LCD display
- Voice Assist Setup and Speaker Phone
- E.164 dial plan support
- STUN server and outbound proxy support
- G.711, G.723.1, and G.729 A/B Codec supports
- Hotline support
- Keypad and Web configuration

ePhone-2000S

Advanced SIP IP Phone

Full feature phone that allows you to make VoIP calls without the need for a computer

Receive and make calls with up to 3 different service provider

Hotline function dial a pre-define number for you for convenient and instant calls

Pre-configured with AirLive.SIP account for instant connection without complex configurations

Free calls to other AirLive VoIP devices through AirLive.SIP server

- 1 WAN port
- DHCP / Fixed IP / PPPoE mode
- Simultaneous registration with 3 proxy services
- Large LCD display
- Speaker Phone, music on hold, speed dial, auto-redial
- E.164 dial plan support
- STUN server and outbound proxy support
- G.711, G.723.1, and G.729 A/B Codec supports
- Hotline support
- Keypad, Telnet, SNMP and Web configuration

VPN Routers

Maximum Security at Minimum Cost, that's what AirLive™ VPN Router delivers. AirLive™ IP-2000VPN is tailor designed for the SOHO and SMB market. It creates a safe and secured connection through the Internet using your existing broadband connection. It encrypts all data before sending it out to the public, thus protecting your important and valuable data.

AirLive™ IP-2000VPN allows you the flexibility to create a Site-to-Site VPN or a Client-to-Server VPN. Whether it is a Site-to-Site or Client-to-Server VPN connection, AirLive™ IP-2000VPN works right out of the box with all existing operating systems and eliminate the need of any 3rd party software.

And with its compact design and durable yet light metal housing, AirLive™ IP-2000VPN is the perfect companion for the frequent business travelers as it allows secure connection to the office network from anywhere in the world where Internet connection is available.

IP-2000VPN

Internet VPN Router

Work right out of the box with all major operating system without need for 3rd party software

Built-in with both IPSec and PPTP server for maximum choice

Creates up to 10 simultaneous VPN connections, for connecting to multiple sites

Works with all protocols from major ISP around the world

Built-in firewall and DoS protection for additional security

- Build Office-to-Office Network with IPsec VPN Server
- Working from Home to Office with PPTP VPN Server
- SPI and DoS Firewall
- Setup Wizard for simple installation
- Step-by-Step VPN Example Guide

Ethernet Switches and Accessories

Design for visual excellence and robust functionality, AirLive™ Live Series Ethernet Switches fit right into the elegant design of your home and at the same time providing you with a high performance switching engine.

Equip with both 10/100 BaseT and 1000 BaseT Gigibit ports with auto sensing capability, AirLive™ switches let you transfer the data at the maximum possible speed without the need to worry about compatibility issue.

For the Gamers, our pure Gigabit switches will satisfy your most demanding gaming needs ensuring you smooth play with virtually no latency.

And for the Wii™ players, AirLive™ EtherWe-1000U connects your Wii™ Console to the network in a matter of second. Featuring a Zero Installation Plug n Play function, your Wii™ will enjoy high speed Ethernet without the fuss of wireless setup.

POE-FSH804

8-port Fast Ethernet POE Switch

High performance switching engine

Works with all IEEE 802.3af compliance devices

PoE port allows you to transmit both power and data to devices where power outlets are inadequate

- 8 x 10/100Mbps Fast Ethernet port
- 4 PoE ports included
- Comply with 802.3af standard
- Auto MDI/MDI-X

POE-48TU

802.3af PoE Splitter with Switchable Output

Convert your existing Routers / APs to IEEE 802.3af compliance devices

- PoE splitter for outdoor AP, CPE and IPCam
- Accept 48V DC PoE input voltage
- Support 5V, 7.5V, 9V and 12V output switchable
- Comply with IEEE 802.3af standard

POE-48PB

48V PoE Power Adapter with DC Injector

Power your PoE ready devices through the PoE port without the need of a PoE switch

- 48V PoE Adapter with DC Injector
- PoE kit for PoE AP and CPE
- Up to 100 Meter Cable Length
- Recommended for WLA-9000AP, WHA-5500CPE, WL-5470POE, WH-5420CPE, POE-100CAM, POE-200CAM, OD-300CAM

Also Available:

POE-100AF

POE-48TU + POE-48PB

POE-2P

Passive PoE Kit

Power your PoE ready devices through the PoE port without the need of a PoE switch

- Passive PoE Splitter + Passive PoE Injector
- Easy to install PoE Application for AP, CPE, IP Cam, IP Phone
- Use the Power Supply from Powered Device
- Accept up to 57V Voltage Input

Live-800G

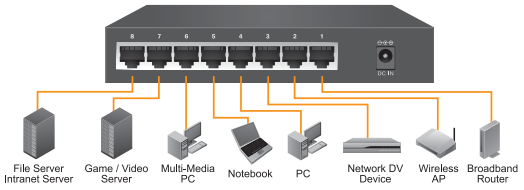
8-port SOHO Pure Gigabit Switch

Sensational 1000Mbps – 10 times faster than a regular switch

Ideal for multimedia applications such as video streaming

Durable and lasting metal housing

- 8 x 10/100/1000Mbps Gigabit ports
- Metal Housing design
- 16Gbps Backbone Speed
- Non-blocking wire-speed



Live-FSH5PS v3 / Live-FSH8PS v3

5/8 ports 10/100Mbps Fast Ethernet Switch

Cost-effective with a high performance switching engine

Elegant plastic housing and compact design

- **Live-FSH5PS v3:** 5 x 10/100Mbps, Auto sensing
- **Live-FSH8PS v3:** 8 x 10/100Mbps, Auto sensing
- Plastic housing with Compact size design
- Wired Speed switching
- LED indicator for speed and link status

Live-FSH5PS / Live-FSH8PS

5/8 ports 10/100Mbps Fast Ethernet Switch

Cost-effective with a high performance switching engine

- **Live-FSH5PS:** 5 x 10/100Mbps, Auto sensing
- **Live-FSH8PS:** 8 x 10/100Mbps, Auto sensing
- Wired Speed switching
- LED indicator for speed and link status
- Ultra Compact Housing

Live-GSH5T v2 / Live-GSH8T v2

5-port/8-port 10/100/1000BASE-T Gigabit Switch

High performance copper based Gigabit ports switch with maximum speed up to 1000Mbps

Stackable housing for space conservation and neatness

Using existing Cat.5 cable. Need not purchase expensive cables

- **Live-GSH5T v2:** 5 x 10/100/1000Mbps Gigabit ports, Auto sensing
- **Live-GSH8T v2:** 8 x 10/100/1000Mbps Gigabit ports, Auto sensing
- Stackable plastic housing
- Metal back panel for better heat dissipation
- 10Gbps Backbone Speed
- Non-blocking wire-speed

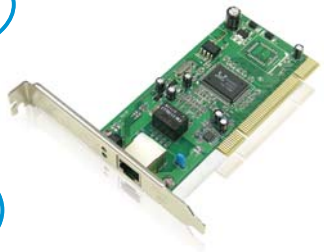
GE-2032R v3

32-bit Gigabit Copper Ethernet Adapter

High performance PCI network card with up to 2000Mbps in full duplex mode

Using existing Cat.5 cable. Need not purchase expensive cables

Support Tag VLAN when use with managed switches



- 32 PCI Bus Master Interface
- 10/100/1000Base-T RJ-45 Port
- Supports PCI bus 66 or 33Mhz
- Low Profit le kit for mini PC.
- Support 802.1Q Tag VLAN, Wake-On-LAN
- Driver support for various operation systems

LFE-8139HTX v1.3

PCI Fast Ethernet Adapter

Cost-effective and high performance Fast Ethernet PCI network card

Plug-n-play for a fast and zero driver installation

- 32 PCI Bus Master Interface
- 10/100Mbps RJ-45 Port
- WHQL Certified
- Wake-On-LAN support
- Boot ROM Socket
- Driver support for various operation systems

EtherWe-1000U

USB2.0 Ethernet Adapter

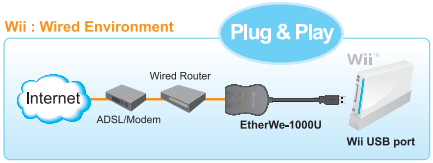
Hi-speed USB 2.0 Fast Ethernet adapter

Works with all major operating systems

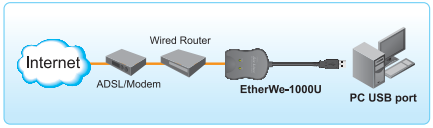
Compatible with Wii™ game consoles – Plug into your Wii™ USB port and you are connected to the network, it's that simple

- Working with Windows 2000, XP, Vista, Vista 64
- Compatible with Wii™
- Access Internet from Wii™ USB Port
- Zero Installation Plug in Play

Wii : Wired Environment



PC/Mac : Wired Environment



Powerline Adapters

Delivering your data with POWER

AirLive™ Powerline adapters are breaking down the wall. Well, not literately, of course. Wireless technology does have its limitation and until now, even the most advance wireless technologies are unable to pass through certain physical obstacles such as a thick wall like a room in the basement.

Using your existing electrical wiring, AirLive™ PowerLine Ethernet Adapter can extend your WLAN network by delivering data to areas where your wireless signals are unable to reach. You can also use the PowerLine Adapters to build a complete network solution.

With transfer speed up to 200Mbps, you can be ensured of a fast, smooth and secure connection.

HP-3000E

200Mbps Powerline Ethernet Adapter

Fastest powerline adapter currently available in the market at an amazing speed of up to 200Mbps

Uses existing electrical wiring to deliver your data

Zero driver installation for a fast and easy setup

Helps to expand your wireless network by extending the connection to area where wireless signals are unreachable

- PowerLine Ethernet Adapter / Bridge
- 200Mbps Powerline Standard
- 1 x 10/100Mbps Ethernet Port
- Zero Driver Installation
- Work with 110V, 220V, and 240V electric outlets.
- Configuration Utility included

HP-1000E v2

14Mbps HomePlug Ethernet Adapter

Fast and affordable way to connect your computers

Zero driver installation for a fast and easy setup

Uses existing electrical wiring to deliver your data

Helps to expand your wireless network by extending the connection to area where wireless signals are unreachable

- PowerLine Ethernet Adapter / Bridge
- HomePlug 1.0 compliant, 14Mbps
- 1 x 10/100Mbps Ethernet Port
- Zero Driver Installation
- Work with 110V, 220V, and 240V electric outlets.
- Configuration Utility included

Advance Wireless Solutions

For the power users, we have just the right devices for you too. Using technology and functions that are normally found in huge expensive outdoor access points, AirLive™ Advance Wireless products let you experience the full power of WiFi technology right in your home or office environment and at a price that will not burn a hole through your pockets.

With devices that feature dual bands dual radios, up to 14 different operating modes, traffic bandwidth control and built-in PoE port, it will satisfy the needs of even the most adventurous power users and lets you built a complete wireless network that only you can imagine.

AirMax5

802.11a 108Mbps Wireless Outdoor CPE

Simple All-In-One Solution that works right out of the box allowing you to build 5GHz outdoor connection instantly

High performance, high power, 108Mbps Atheros 11a radio allows coverage of 3 kilometer or more

New generation wireless 5GHz CPE that gives you greater value, feature, performance, and reliability

Option for external antenna for greater versatility and cover all your networking needs

- Built-in 14dBi antenna
- 23dBm 11a Output Power
- Antenna Alignment LED
- Double Memory Size
- Double Mounting System
- AP, Bridge, Client, Router, WISP modes
- Bandwidth Control, Multiple SSID, Tag VLAN
- Powered by Advanced Passive PoE

WLA-9000AP

Dual Band Dual Radio Access Point

VLAN and QoS services for bandwidth management control

14 different operating modes provide even greater flexibility when it comes to deployment

Breakthrough Wireless Full Duplex function doubles the link speed of a bridge connection

2 x High Power Radios for greater power and distance

- 1 x 108Mbps 11a Radio + 1 x 108Mbps 11a/b/g Radio
- 3 LAN/WAN Ports
- 802.3af PoE port
- Support Atheros Super A and Super G mode
- Up to 23dBm Output power in 11a mode
- Bandwidth Control, Multiple SSID, VLAN
- Operate in 2.4GHz and 5GHz
- 14 Wireless Operation Modes including AP, bridge, client, router, gateway and repeater
- Wireless Duplex Mode
- SNMP, Web, Telnet Functions

WLA-5000AP v3

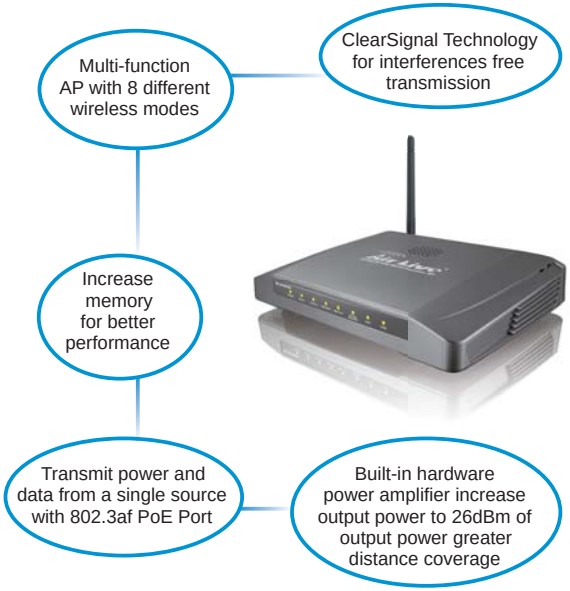
108mbps 802.11a/b/g Multi-function AP

Multi-function AP that is designed to operate in the 5GHz or 2.4Ghz spectrum
6 wireless mode for flexible deployment
Multiple SSID and VLAN to create multiple service zones

- 802.11a/b/g compatible, 2.4Ghz and 5Ghz spectrum
- Detachable Antenna with R-SMA connector
- AP, WDS, Bridge, Client, WISP mode selectable
- Atheros 108Mbps Turbo Mode
- CE certified with TPC and DFS
- Bandwidth Control, WDS Site Survey, RSSI
- Multiple SSID, VLAN, TOS, WMM
- Watchdog, SNMP support, and ACK Calculator

WL-5470POE

Hi-Powered PoE Access Point with 8 Operation Modes



Multi-function AP with 8 different wireless modes
ClearSignal Technology for interferences free transmission
Increase memory for better performance
Transmit power and data from a single source with 802.3af PoE Port
Built-in hardware power amplifier increase output power to 26dBm of output power greater distance coverage

- High-Powered PoE Access Point with 8 Operation Modes
- SSH2, HTTP, HTTPS and Telnet Managements
- Up to 26dBm Output Power for both 11g and 11b(South America)
- Bandwidth Control and Antenna Alignment Signal Survey
- Wireless Client Isolation, Watchdog, ACK Timeout, TX power adjustable
- ClearSignal Technology for best performance in heavy interference
- 4MB Flash, 16MB Flash, 802.3af PoE

WL-5470AP

802.11g Multi-function 5-port AP + Router

Multi-function AP with 8 different wireless modes

Built-in hardware power amplifier increases output power to 26dBm of output power greater distance coverage

Bootloader function prevent firmware crashes during upgrade thus disabling your device

Advanced feature such as ACK Timeout and RSSI function makes it suitable for long distance application

- 23dBm(11g) and 26dBm(11b) TX power
- 5 x 10/100Mbps ports,2MB Flash, 16MB SDRAM
- Client Router, Universal Repeater, WISP + Universal, Gateway mode
- AP, Router, Bridge, Client, Repeater, WDS mode
- Traffic Bandwidth Control, WDS Site Survey, RSSI
- WDS Site Survey, Telnet, Web, and Tx Power Regulation

WL-5460AP v2

802.11g Multi-function AP

Multi-function AP with 8 different wireless modes

Bootloader functions prevent firmware crashes during upgrade thus disabling your device

Advanced feature such as ACK Timeout and RSSI function make it suitable for long distance application

Up to 26dBm of output power greater distance coverage

- 20dBm(11g) and 26dBm(11b) TX power
- 2 x 10/100Mbps ports, 2MB Flash, 16MB SDRAM
- AP, Router, Bridge, Client, Repeater, WDS mode
- Traffic Bandwidth Control, WDS Site Survey, RSSI
- Client Router, Universal Repeater, WISP + Universal mode
- WDS Site Survey, Telnet, Web, and Tx Power Regulation

WAE-5AG

5dBi Dual Band Outdoor Omni Antenna

- Works in Both 5G and 2.4G frequency band
- Up to 7dB in 11a mode
- Up to 4.5dB in 11g/b mode
- For up to 1km distance
- Male N-Type Connector for Direct Installation on outdoor AP
- Design for AP+Bridge and Hotspot installations

WAE-2415GP

5dBi Outdoor GP Antenna

- 2.4Ghz 15dBi Outdoor GP Antenna
- High gain Omni antenna for wide coverage
- Outdoor point-to-multipoint deployment use

WAE-5024GR

5Ghz 24dBi Outdoor Antenna

- 24dBi 5GHz Wireless Antenna
- Mounting Kits included
- Directional to focus for longer distance
- Designed for outdoor bridge use
- Strong Wind Resistant
